VISION

Creating a safer world through innovation, reliability and trust

MISSION

Our mission is to design, deliver, and maintain intelligent fire and life safety systems that safeguard communities, empower industries, and uphold the highest international standards.

FIREGUARD

Fire protection you can trust

We operate on a national level, using our decades of experience to work in partnership with our clients, consulting and guiding them through the complex world of fire safety confor-mance.

OUR STORY

How we evolved to be the guardians of safety

This is a decade plus long legacy Fireguard has left in the minds of people across the Kingdom by providing a range of high quality fire and safety services for various requirements

Foundation of Fireguard Co. Ltd in 1995 was the culmination of an inspired passion-to be the change. Being based in Saudi Arabia, our decade plus voyage in the Fire and Safety industry has now been stretched to every nook and corner of the country. Our constant efforts to enhance safety measures focus various spheres of lives, assets and business ventures. The resolution to bring wider perspectives and effective changes in the measures, methods and tools ensuring safety of the properties and lives has now been placed us in the upper echelons of the industry.

Fireguard takes pride in being the expert of value engineering, estimating, supplying, executing, testing and commissioning fire protection systems and fire detection systems to our potential clients who have been the standing testimonies of our excellence.

Outstanding operation and implementation of the available technology, our pool of experts contributing towards each stage of execution, are the mighty pillars behind all our policy decisions.

Now, a set of promises from Fireguard - all the fire and safety measures we deliver are strictly in compliance with the stipulated safety regulations of International NFPA codes.

قمتنا

كيف تطورنا لأن نكون حماة للسلامة

HEALTH & SAFETY POLICY

We endeavour to ensure that all matters of health and safety are an integral part of our activities during the provision of our goods and services.

In order to maintain a safe and healthy working environment, we provide a safe means of access to and from all workplaces, including on-site, for all employees at all times. Site inductions are conducted at every site before we commence works and everyone involved in the project is aware of the risks and measures taken to reduce all potential hazards.

Firequard understands the seriousness and responsibilities of health & safety and ensures that every staff member is thoroughly trained to take the appropriate steps and action. To ensure that safety is our first priority, we use only reputed and reliable products, made with international standards like FM, UL, ULC, LPCB, MEA and CE. All our functions are in compliance with all those significant safety codes such as NFPA, OSHA, SASO, FPA, NFSA, Saudi Civil Defence etc.

FIRE AND SAFETY TRAINING

The purpose of our Comprehensive Fire Training Program is to educate participants on fire safety and arm them with the knowledge to prevent an outbreak of fire and skills to successfully take action against fire

Participants will be able to handle

- The duties of a fire warden
- Various types of fire
- Different evacuation procedures
- Fire Action Routine for all employees and visitors
